**Fix Auto Saint John**  
Saint John, NB

Fix Auto Saint John, owned and operated by Scotts auto Body was looking for a solution for their body shop dust. After talking with Atlantic Aircleaning, we

decided that UAS Dust Cats were perfect for the application.

DA Dust Cats have a Apx. 2000 CFM and these Media Bag Collectors can help your body shop meet occupational Health and safety requirements for employee health and safety by removing contaminants from the air.

Designed as a simple and economical solution to collect dry particles, these systems collect small, large or conductive materials. These units contain high-efficiency filters ideal for removing smoke, dust, oil mist and other pollutants from a facility. These collectors also trap airborne contaminants generated by many operations such as grinding, sanding, powder handling and more. The filters are easy to replace and clean, and the media collection surface holds up to 30% more contaminants than comparable products— which means less frequent filter changes!

*Performance granted to comply with local and federal clean air regulations*

**New Brunswick    Nova Scotia    Newfoundland    Quebec    Prince Edward Island**
